Our 1937 Introduction

KENTUCKY SPORTSMAN, I. D.—In introducing this number last year we believe it to be the most spectacular dahlia to date, in a tri-color, and one that will be mighty hard to beat in this class.

verse. Every petal evenly and distinctly tipped pure white.

Stems are excellent, long, holding the large blooms at a graceful angle. A fine growing plant, a free and early to late bloomer and one that will be a favorite for a long time.

Dahlia Plants

are sprouts or cuttings taken from stock of named varieties, started early in the greenhouse, rooted in sand benches, potted and grown inside until established, then moved to cold frames for hardening off, ready for shipping and field planting.

If you do not grow your Dahlias from green plants, we suggest that you give them a trial, for, when properly grown from healthy stock and given the care that any plant requires, they will give you better blooms and will make a nice clump of roots for future plantings. However, they must be cultivated and watered, and, if insects bother, sprayed with an insecticide.

Dahlia Green Plants are ready for shipment after May 15, and will bloom about the same time as roots that have been planted three weeks earlier. The price of plants is one-half or less than the price of roots of the same variety. We recommend their use very highly, especially for our local conditions.

Dahlia Collections

We are offering this season special collections made up of one tuber each of my most popular varieties. This gives an opportunity of securing a choice collection at a greatly reduced cost. These collections are carefully balanced as to color, and are made up of large Dahlias only. There are twelve guaranteed tubers in each collection, all labeled. We prepay all postage.—\$3.00 to \$10.00.
